

Campus Management System for Education and Learning

GIV-Campus is a software solution for enabling optimized and continual operation of campuses and education facilities.

GIV-Campus provides a holistic solution ensuring continual operation by implementing Smart Asset Management and a “Just In Time” methodology to the operation of the facility.

GIV-Campus manages both assets (such as rooms, equipment, machinery etc.) and resources (instructors, study materials maintenance staff etc.). Implementing predictive and proactive maintenance methodologies, asset’s operational lives are extended and their availability is ensured, enabling continuous unhindered operations.

GIV-Campus allows facilities to:

- Enhance and optimize the experience of the the students and staff
- Lower risks to operation
- Efficient operation to minimize or eliminate downtime
- **Save money and reduce maintenance budgets**

Campus Management System capabilities:

- Unified system for full Management of all Data & Processes in Education ORGs.
- Manage, plan, and run academic courses and tangential processes in the organization for all relevant persons.
- Built-in management processes for E2E campus operations across multiple systems
- Optimize campus resource utilization.
- Constantly monitor asset status to plan predictive maintenance
- Manage inventory and workforces

Main advantages:

- Planning and managing with visual tools and a user-friendly interface
- Visual monitoring and management of teaching events in a weekly schedule
- Discrepancies and alert notifications
- Built in tools for scheduling, resources planning Gantt, annual course re-use planning

Template usage and data management:

- Maintain data using various data templates – build a class or course file.
- Built in Class template, basic course template

Scheduling and recommendation tools for optimal resource utilization.

- Automatic scheduling of resources based on a flexible rules engine
- Deployment date recommendation tool based on resource availability.
- Facility rental portal for non-teaching activities based on resource availability

Access to relevant personnel

- Allowing easy access to relevant persons using a variety of tools.
- Built in home page with different personas for professors and students with integrated email/text messages and reports.
