

GIV-RAIL™

GIV Smart City Suite

Vertical Industry Solution using HxGN-EAM™

The Innovative Rail / Metro O&M Solution

GIV-RAIL

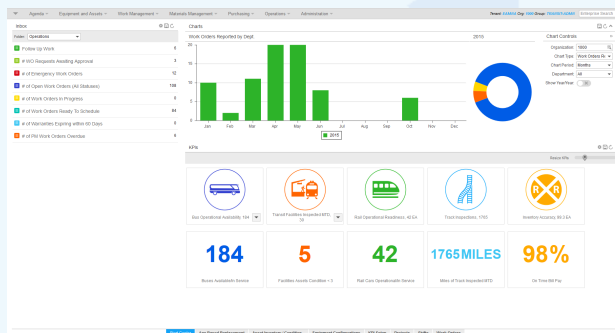

Provides the O&M organization with a holistic platform to manage all operation and maintenance processes. Including both Mobile assets (Rolling Stock) and immobile assets (Systems & Infrastructure).

Award Winning Technology

GIV-RAIL is based on the world leading HxGN-EAM™ solution and technology enabling the highest level of flexibility and adaptability to local standards and needs.

World Standards

GIV-RAIL supports ISO 55001 Standard for Asset Management. GIV RAIL enables the management assets at a high level in order to maximize their lifespan.

Benefits

- Improve your maintenance, logistics and overall efficiency by having the “Real World” inside the software – all operation, maintenance, logistic processes and dependencies are combined and managed on the same platform.
- Mobile application allows access from the most remote locations in the field, even without any mobile connection, such as tunnels or remote track sections.
- Incorporating: CAD and GIS to visualize the complex assets and infrastructure of the Railway / Metro organization.
- High connectivity – GIV RAIL can easily integrate with all SCADA / Fault Management systems to support live events/faults reporting.
- Enabling economical optimized planning of the budget, rehabilitation and maintenance needs.
- KPI & SLA Management – manage your organizations’ KPI & RAM on a single unified platform in order to provide a high level of service.
- A wide range of alerts allow you to always stay ahead of the problem. Be pro-active and not re-active.
